

FERTILITY IN IBD:

EMERGING ASPECTS AND NEW TRENDS

NOVEMBER 29TH 2022

SESSION 1 - 1:00 pm CET

SESSION 2 - 5:00 pm CET

Inflammatory bowel diseases (IBD) frequently occur during childbearing age^(1,2) and the impact of the disease on women's fertility is therefore an important concern for these women, their partners, and the IBD physician.

This webinar aims to assess:

- The impact of non-surgically treated IBD on women's fertility
- The success of assisted reproductive technology in women with IBD vs the general population
- The patient perspective on IBD and fertility

1:00 | 5:00 PM **Fertility in IBD: emerging aspects and new trends: intro 5'**
Silvio Danese, Italy

1:05 | 5:05 PM **Fertility issues in IBD: myths and reality 15'**
